Before you can run the software that operates the microscope, you need to start up the computer and log in to iLab. Here are instructions.

This is called "kiosk" or "software interlock".

If you made reservation in advance

1. Open https://nyumc.ilab.agilent.com/account/login from the web browser (Firefox / Safari or Chrome) using the computer attached to the instrument.
2. Log in using your correct credentials (NYULMC or iLab) and go to Microscopy Core
3. Click on the "**Go to kiosk**" tab which will take you to the interlock page
4. Find your name and reserved instrument
5. click to **start** your session.
6. After approximately 10 seconds you may run the microscope software.
7. We recommend leaving the iLab browser window open in the background.
8. **At the end of your session, as the last step before logging out of the computer, you must stop your session in the same Kiosk mode of iLab.** You will be billed until you stop the kiosk session.

If you don't have a reservation and want to use the instrument as "walk up"

1. Open https://nyumc.ilab.agilent.com/account/login from the web browser (Firefox / Safari or Chrome) using the computer attached to the instrument.
2. Log in using your correct credentials (NYULMC or iLab)
3. Go to the Schedule of microscope you want to use
4. Make a reservation from the available time slots.
5. click on the "Go to kiosk" tab which will take you to the interlock page.
6. click to **start** your session.
7. After approximately 10 seconds you may run the microscope software.
8. We recommend leaving the iLab browser window open in the background.
9. **At the end of your session, as the last step before logging out of the computer, you must stop your session in the same Kiosk mode of iLab.** You will be billed until you stop the kiosk session.
